Introduction

ManwarSingh , Age 24 is a young farmer from Rora village of Mohali District Punjab, is a farmer who decided to pursue his carrier in farming and aims at using more Farm yard manure than a chemical fertilizers . After completion of his Higher Secondary EducationHe left his higher studies.He has two members in his family Father and Mother .His father was a former Army officer due to his non farming background he has never perform any farming practices in past so initially he was new to this ,but from the Age of 22 he started practicing farming in his 3 Acre Land . He has a land holding of 15 Acre in which 10 Acre Land is in Leased which cost around 40000 per Acre in a Year , and in 3 Acre land, he perform his Farming.

Crops grown and its Production

Crop	Land in Acre	Production	Revenue
Wheat	3	84 quintal	160000
Maize	2	30 quintal	80000
Cabbage	1	13000kg	52000

Total Income Annual Income through farming is Around - 2 Lakh 70 thousand rupees.

He aims that in coming 5 to 6 years he will increase his farming land and cultivate a variety of vegetables and establish a greenhouse for more production in future. He use his owned tube well for irrigation. He also Owned a Tractor, Rotavator and Plough and aim of owning a harvester and seed drill in future.

Farming practice that makeMunwar unique from others farmers in his area is more use of farmyard manure in his filed. Munwar is well educated and knowledgeable in farming field he knows that excess use of chemical fertilizers can damage the soil fertility so ,he is more intitled towards using of Cow Dung and Poultry Waste.

AmountUsed and cost of FYM

Manure	Amount	Price
Cow Dung	3 Trolley	2700 Rs
Poultry waste	500kg	800 Rs

Conclusion

Manwaris a young farmer of Age 24 who knows the problems intitled to chemical fertilizers and its long term harmful effect. So he is insping other farmers in his area by using of FYMin large amount ,and also usage of a recommended seed and fertilizers to avoid a deterioration of soil.He is well aware about the climate change happening and its effect on a crops, he give an example of an environmental stress in 2019 He always try to acquired a new techniques of farming in village and also educate their fellow friends ,In this young age he is aiming to do something different from traditional farming practice that is FYM based farming . This is a great initiative ,and also inspiring.
